Pea Shoots Plants	Pea Shoots Plants	
Radish Scallions Spinach	Radish Scallions	Potatoes Radish Scallions
Turnips, salad	Strawberries Cherry Tomatoes Turnips, salad Zuke - Squash	Cherry Tomatoes Turnips, salad Zuke - Squash

PLEASE NOTE: This calendar provides an overview of what crops may be available for harvest during each month, not a guarantee. Fluctuations in weather and nature can effect the timing, quantity, and availability of all crops.

Each weekly share will include a variety of vegetables. We strive to provide 6-8 items weekly. The number of items in the share will be smaller in April and greater in May and June.

Our goal is to provide lettuce each week along with our market favorite mixed greens. In addition to the salad greens, we try to balance the share with vegetables for cooking and raw munching.

Our 3 hoophouses/high tunnels will allow us to bring you some crops earlier in the spring (cucumbers, zucchini, and tomatoes).

In April, in addition to vegetables, shareholders receive potted plants with their share. Shareholders will select their plants from a list of herb, tomato, and pepper plants we have available.
